MCS-80

MCT-450

Our company is growing rapidly due to the reputation we are earning in the underground construction, land based and offshore oil drilling, geothermal, HDD and water well drilling industries.

The staff at Mud Technology has many years of combined experience in the field of pumping, handling, moving, cleaning and mixing drill fluid.

Our units are designed to be self-contained, quiet, efficient and reliable.

We offer the best mud handling systems on the market today. These units have been tested in one of the hardest test facilities around- THE REAL WORLD, and survived.

Custom Manufacturing

Whether you need under 100 gpm or over 1000 gpm, our engineering staff can design or modify any one of our units to meet your specific needs.
